A professional distributor leading to the future!

What will surprise us, what will make us happy or what will make us comfortable in our daily life? Links continually ask itself to provide the best possible answers to these user-oriented questions in supplying products and services to the market.

Links is not just a distributor. It does not only literally links users with suppliers, but also provides planning, development and all the way up to users support for satisfaction and trust.

You can rely on the long-term relationship of trust that Links has developed among parts suppliers across the world, many retailers and media over the years.

Links is proud of it. Links will keep providing attractive products and services to customers by taking advantage of its know-how and backup as a leading distributor. So keep an eye on Links.

To retail customers:

Links are always ready to supply you with a wide range of products as well as the latest computer components either in small or large lots.

Links has its own warehouse to maintain a stable supply of products. The latest technical information and original promotional materials are always available to give you full support for more sales.

To manufacturers:

Links has a capacity to supply a wide range of computer components for the system production by system integrators or OEM suppliers in a small lot. Links is always ready to propose the best possible solutions for specific applications, prices, lot sizes or desired delivery time. Please feel free to contact us.

To suppliers:

Links provides the latest technical and product information to customers and users in a timely manner based on the product and marketing strategy shared with customers.

Links build up a firm relationship with retailers through the support of floor management, inventory management, setting up promotional materials and other fine-tuned services for suppliers to develop their business.

Links creates values

Links develops the planning, products and sales of original products via broad network with manufacturers across the world.

These capacities, another great advantage of Links, make it possible to reflect the voices of end-users and retailers directly in product development.

Links private brand **iCharge**

iCharge series is one of the prime examples of original products by Links. It is a portable charging system that applicable to major cell phones as well as iPhone, iPod by Apple.

iCharge has three-way charging methods, by solar power, AC power and USB port. The latest model of iCharge is even lighter and more convenient and overwhelmingly accepted by business persons who are often on the road or travel as well as students and housewives.

Original merchandising goods

Links also proactively proposes attractive promotional materials to develop your sales.

Ask Links about your own specifications such as colors, corporate logo, package design, sizes and others. Links produces original promotional goods as you request.

Links is ready to meet your demand

Links is located in Akihabara, Tokyo and has its own support center, logistics, photo studio, Links SHOWROOM and conference room. These facilities enables Links to meet demands by end-users, retailers, suppliers and clients.

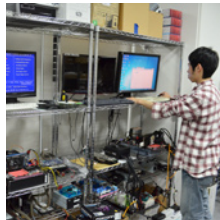

Head Office

The head office of Links is located in Akihabara, Tokyo. It has all of the main facilities including a support center, logistics, a conference room, a photo studio and a showroom. These facilities ensure a quick and reliable response for you. You can totally rely on Links for developing business with all-around computer components.

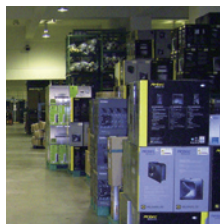

Support center

Links has its own proof center and a support center in house. These facilities enables Links to respond to claims or valuable information from customers in a prompt manner and to propose appropriate countermeasures to back to customers. Important information from suppliers, retailers and end-users are all shared with Links. Over 10 years of a high reputation for supporting motherboards, in particular, is proven fact that Links has one of the best supporting system in Japan.

Logistics

Links has its own logistics in Akihabara, Tokyo, a site that the latest computer components concentrate. The distribution base, located in the same building where Links' home office is, enables Links to supply goods quicker than anybody else and ensure prompt response to such as a request for product materials or customer support. A small lot order is also available from the warehouse.

Conference room

Links has a comfortable conference room, within walking distant from Akihabara, available for you to have a good business talk. The facility gives valued customers and suppliers great opportunities for close communication with Links. That will assure you of a satisfactory result. T

Photo studio

Links is equipped with its own photo studio. Links photographs products rather in house than just waiting for images from suppliers, so that it will provide high-resolution images to end-users, retailers or media in a prompt manner. Links always pay an utmost attention to what information customers are looking for or what the best way can be to appeal products.

Branch office in U.S.A.

Links has a branch office in the U.S. distributing wetsuits and clothing from L.A. to Japan.

Links maximizes the appeal of your products

Links has a capacity to offer the following services:

- Taking photos of all lines of products in house
- Preparing a news release or a website in a proactive manner
- Continually transmitting the hottest information to relevant media
- Delivering appropriate information fine-tuned to the Japanese market
- Supplying product images, managing samples products and offering giveaways
- Planning various advertising activities on the web or in magazines
- Organizing attractive articles or events pinpointing mutual needs, based on the long-term relationship that Links has built up with leading media.

If you make the best use of these marketing and public relations of Links, you will surely be able to maximize the appeal of your products. That is the greatest strength of Links.
